

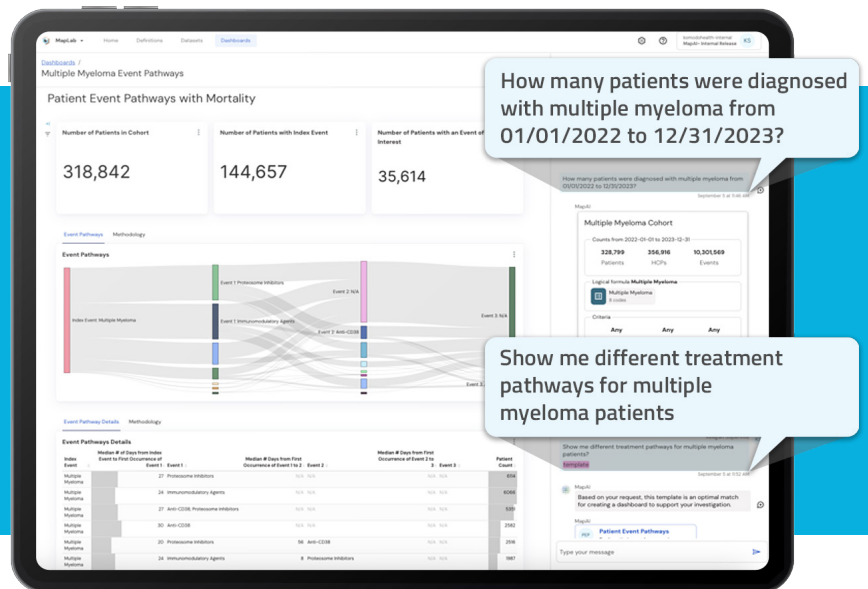

MAPVIEW FOR CLINICAL DEVELOPMENT TEAMS

Quickly Go From Question to Answer to Action With Our No-Code Solution

Kick-start insight generation
with AI assistance.

Drive clinical trial design and
execution *with confidence.*

Access to real-world data insights is the key to optimizing and accelerating clinical trials. But generating insights can take weeks or months as teams wait for data scientists or consultants to deliver analyses.

That's why Komodo created MapView™, a no-code, user-friendly solution featuring dashboard templates and our generative AI analytics assistant, MapAI™.

MapAI empowers all users — even those with no technical or analytical skills — to explore our [Healthcare Map™](#), the industry's most comprehensive and complete source of patient-level data. MapAI's natural-language chat format helps you investigate disease incidence, identify unmet needs, and test hypotheses. It will then suggest out-of-the-box [dashboard templates](#) from your custom library to guide deeper research on all facets of building your trial.

With MapView and its gen-AI assistant, every member of your team can facilitate better, faster decision-making to accelerate clinical trial success.

Visit komodohealth.com/solutions/mapview to find out more.

Quickly — *and Continuously* — Shape Trial Design and Execution Strategies With Real World Insights

SCENARIO MODELING

Conduct cohort comparisons to model and understand the impact of inclusion/exclusion criteria.

SITE SELECTION

Assess the availability of screening-eligible patients, and landscape previous and current trial site activity.

INVESTIGATOR SELECTION

Evaluate each HCP's trial experience, trial activity, eligible patients, and patient volume trends.

DISEASE LANDSCAPING

Understand the therapeutic landscape across specific patient populations to inform pipeline strategy and asset optimization.

MAP PATIENT JOURNEYS

Explore common events before and after diagnosis or treatment to understand care patterns.

DIVERSIFY TRIAL PARTICIPATION

Identify key points in diverse patient journeys to determine intervention. Direct recruitment strategy with census-level race and ethnicity patient data.

ABOUT KOMODO HEALTH

Komodo Health is a technology platform company creating the new standard for real-world data and analytics. We pair the industry's most complete view of patient encounters with enterprise software and machine learning to connect the dots between individual patient journeys and large-scale health outcomes. Across Life Sciences, payers, providers, and developers, we help our customers unearth patient-centric insights at scale. We marry clinical data with advanced algorithms and AI-powered software solutions to inform decision-making, close gaps in care, address disease burden, and help enterprises create a more cost-effective, value-driven healthcare system. For more information, visit [Komodohealth.com](https://www.komodohealth.com).
