marmot™

# Finally, Healthcare AI Built to Be Your Thought Partner

Forget generic AI. Making confident healthcare decisions demands complexity that a one-size-fits-all solution can't provide. Given healthcare's high stakes and standards for data and trust, relying on generic tools — or risking a multimillion-dollar DIY build — keeps AI's promised impact out of reach.

70%
of Life Sciences leaders consider adopting AI an "immediate priority"[1]

32%
of data scientists feel confident that their data is "AI-ready"[2]

8 in 10
companies report using generative AI, but with no significant business impact[3]

There is a better way.

Marmot:
Where Your Healthcare Expertise Meets AI

Marmot™ unlocks insights trapped in complex healthcare data through full data-to-AI integration and validated methods. Built on Komodo's full-stack thesis, every layer — from the Healthcare Map® to platform, applications, and AI — works seamlessly together.
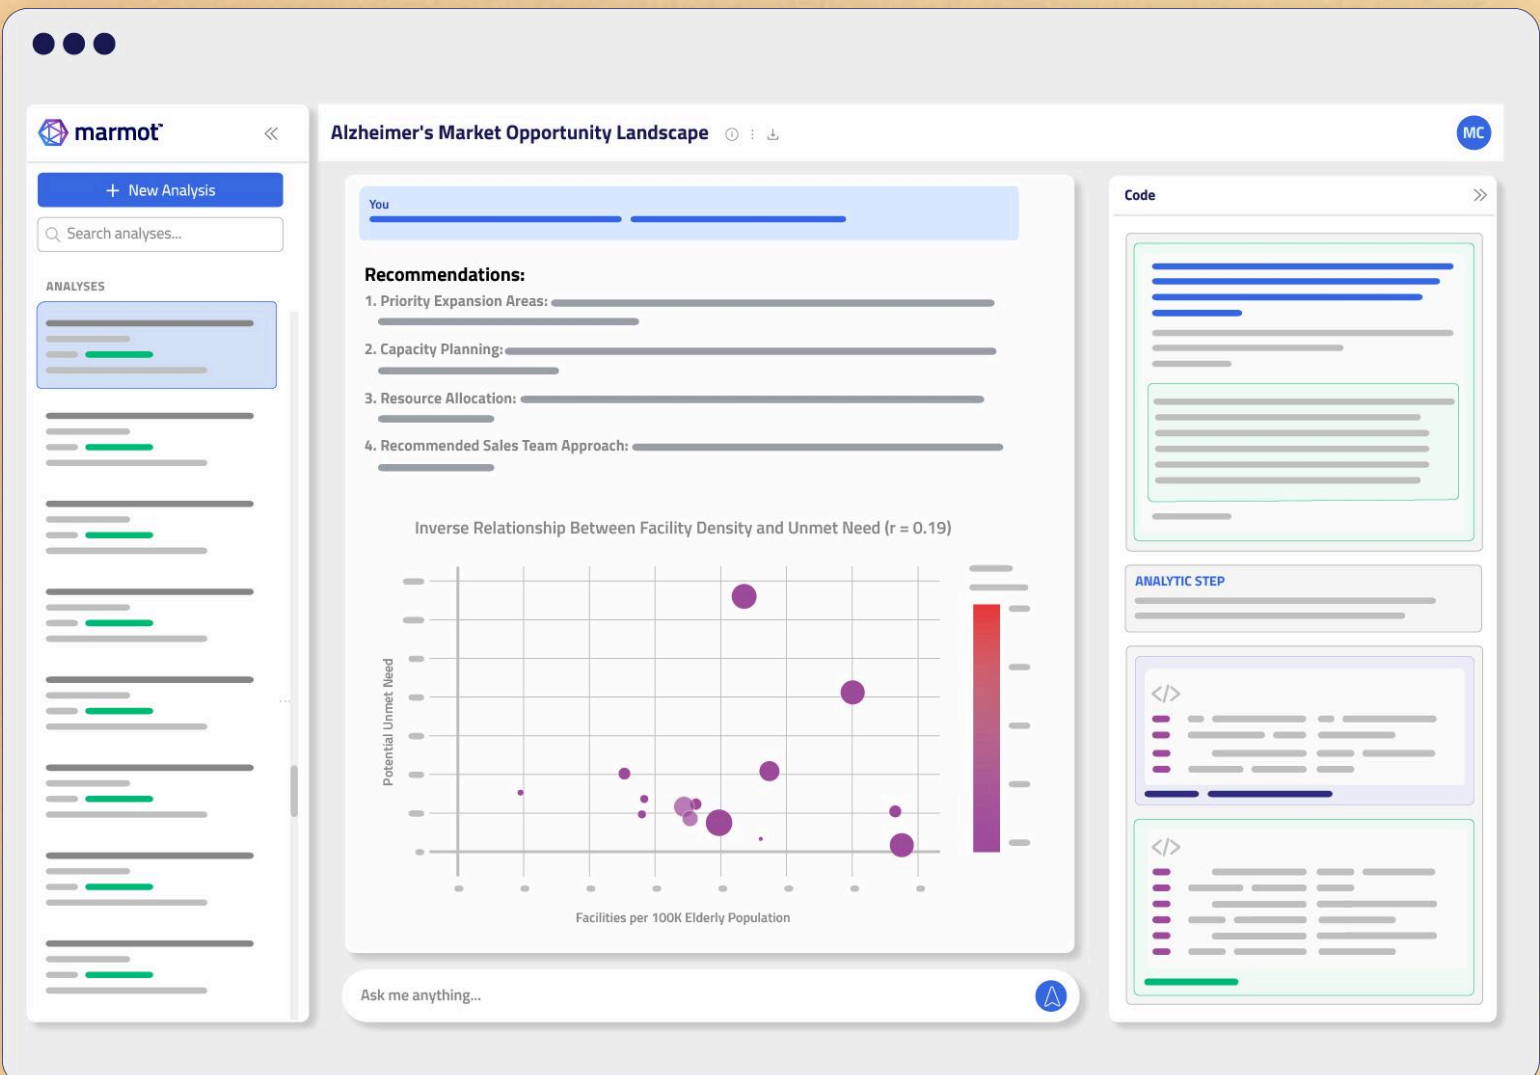

Democratized Insights
Bring data to life for everyone in your organization, from data scientists to non-technical users.

A Unified Platform
Combine software, AI, and analytics into a single source of truth.

Open Data Ecosystem
An API-first architecture unlocks the value of your existing data and IT.

Healthcare Map: Best-in-Class Real-World Data
High-quality, unbiased, AI-ready data helps you understand the patient journey.

Day 1 Value
Fit-for-purpose applications provide immediate insights for your team.

By combining the unmatched fidelity of Komodo's Healthcare Map with AI, Marmot transforms complexity into clarity and gives you what others can't:

Transparency and Trust
Marmot's methodology ensures that any analyst can reproduce results, providing quantified confidence metrics and low hallucination risk.

Empowerment and Speed
Your team's expertise is your greatest asset. Marmot amplifies their impact with collaborative intelligence that enhances, not replaces, their strategic thinking.

AI That Speaks Healthcare
Marmot's domain-specific AI is natively built on Komodo's data, providing the nuanced reasoning needed to solve hard analytic problems at scale and outperform generic AI.

10+
years of regulatory-grade data backs every rich, contextualized journey across patients and providers.

1M+
analyses across the Healthcare Map, refining every insight.

Fragmented AI costs you more than just dollars, it erodes speed, consistency and credibility.

While you're building your own AI model, your competitors are winning. The real cost of a DIY approach isn't the effort, it's the market share you lose every month you're not acting.

Marmot gives you intelligence at scale with one solution so you can stop trading speed for the illusion of control.

Experience the power of unified AI.   **Learn more →**
