

DATA + SOFTWARE + SERVICES

Research-Grade RWD and Analytics Solutions Built for HEOR/RWE Teams

Generate evidence with confidence for health economics and outcomes research studies (HEOR) by leveraging the most comprehensive longitudinal source of real-world patient data, enhanced by specialty datasets.

Life Sciences, academic, and government institutions choose to partner with Komodo Health® to conduct and publish HEOR studies, citing:

- **Breadth and depth of our data:** Our [Healthcare Map](#)® encompasses the longitudinal patient journeys of 330 million de-identified, unique patients – with 143 million closed, linkable patient lives per year
- **Seamless linkage to specialty datasets:** Lab, genomics, EHR/EMR, social determinants of health, and more
- **The expertise of our research consulting team:** [Our team](#) partners with HEOR/RWE teams to generate white papers and studies for a range of uses, from peer-reviewed publications to regulatory submissions
- **Research-grade data validation:** More than [400 publications](#) use Komodo data across multiple disease areas, from oncology to rare disease

Enrich, Expand, and Accelerate Your Research With Komodo Health

Komodo Research Dataset

An optimized data schema of Komodo's underlying Healthcare Map specifically created for RWE generation and HEOR studies. Komodo Research Dataset includes routinely collected medical and pharmacy encounters, health services expenditures, and utilization records from administrative data and claims. Komodo Research Dataset provides **healthcare cost data** derived through a proprietary imputation model built on 4.4 billion claims. Our patient-level observations utilize HIPAA-compliant tokenization to capture over 330 million de-identified, unique individuals in the U.S.

Key Differentiators

- Cost Variables
- Utilization Categories
- Units of Utilization
- Patient Insurance

MapEnhance

Extending the value of the Komodo Research Dataset, **MapEnhance**® allows you to select and access exclusive, highly curated data sources from Komodo and our leading industry partners. Layer multiple datasets onto our claims-based foundation via a single contract, and we deliver a pre-integrated, fit-for-purpose data product that gives you the deepest insights and the most complete view of the patient journey – faster.

Specialty Datasets

- Laboratory
 - Genomics
 - EHR/EMR
 - Mortality
 - Race and Ethnicity
 - Social Determinants of Health
- ...and more.

Komodo Patient Insurance

Komodo Patient Insurance provides detailed insights into payer entities – capturing 200 million patients a year assigned to an insurer, including both primary and secondary. Researchers can now understand how patient journeys differ between groups/channels such as commercial and Medicare; or dig deeper with a segment level analysis of Medicare FFS and Medicare Advantage.

Insurance Status Detail

- Group/Segment
- Processor
- Parent/Payer
- Sponsor/Employer
